The 5th Biennial Conference of Israel's Technology Transfer Organization

TECH TRANSFER 4.0 REINVENTING TECHNOLOGY TRANSFER

October 22-24, 2018

October 22, 2018
CONFERENCE

David Intercontinental Hotel, Tel Aviv

October 23-24, 2018
WORKSHOPS & TOURS

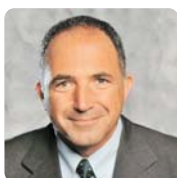

At Vendors' Site

ITTN's 5th biennial conference will showcase the changes occurring in Israel's tech transfer environment such as:

- Israel's integrated approach to tech transfer.
- Facilitating the relationships and the free transfer of ideas between academia and entrepreneurs, investors, industry and community.
- The fast deal making approach employed by Israeli universities today.

The event includes the biennial conference day, multiple workshops by leaders in the field, as well as tours of some of the most active and innovative tech hubs in Israel.

ITTN - Workshop Program

October 23nd, 2018 | Weizmann Institute of Science

Session 1

From "cradle to grave" an overview of the technology transfer process

Gil Granot Mayer

- Research – creation of IP and know-how
- Getting to know your campus
- Invention disclosure
- The patent process
- Due diligence
- Pre-commercialization work
- Getting your chain of title right
- When to commercialize?
- Getting the right deal
- Post deal work
- Royalties and distribution
- Re-licensing

Session 2

Let's Get To Business: Commercializing Early-Stage Research

Tamir Huberman

- The necessity and use of an internal database in commercialization of early stage research.
- A company website as a major tool for offering early stage research and capabilities
- The use of Social Media to engage with potential licensees and showcase the Research

Session 3

Managing Intellectual Property

(Speaker-TBD)

- An introduction to intellectual property
- Establishing a proprietary position
- The declaration of invention
- Best practices for portfolio management. Managing and budgeting the patent portfolio pre-filing and post-filing
- Patents as tools for a business strategy
- The life-cycle of the patent

ITTN - Workshop Program

October 23nd, 2018 | Weizmann Institute of Science

Session 4

Legal Aspects; Agreements

Aaron Jaffe

Third-party dynamics of research & business development

- Funded research agreements
- Confidential disclosure agreements
- Material transfer agreements
- Collaboration agreements
- Consulting and service agreements
- Inter-institutional agreements
- Consortium agreements
- Visiting scientists and personnel matters

The art of academic licensing

- The (im)balance of risk in academic tech transfer
- Separation anxiety vs commercial autonomy
- Key points in the licensing playing field
- Variations on classic patent licensing: discovery tools, reach through royalties and anti-competition
- Hedging your royalties – optimized royalty bases

Managing the process of licensing negotiations

- Internal and external players
- The startup licensee
- The big pharma licensee

Session 5

Dedicated Investment Funds

Yaron Daniely

- Why create dedicated funds?
- The business models: equity and revenue sharing
- Integra holdings
- Agrinnovation
- Other potential models

* The program is subject to changes
